EXPERIENCE

Vianaar (Team size: 2) Laravel, Php, Mysql, JQuery   May 2024 - Present

- Vianaar is a Goa-based web application used by the Vianaar team to manage villa apartments, owner data, project status, caretakers, and requests. The application handles all these functions from a centralized platform. We are need to revamp the old PHP code into a Laravel MVC Structure. from tables.
- Updating the web application as per new requirements

PROJECTS

My Portfolio (Individual) Reactjs, Tailwindcss

- Developed a responsive and user-friendly portfolio website using React.js basics, showcasing my passion for web development.
- Successfully hosted the portfolio website on GitHub Pages for easy accessibility and viewing.

SoldierSlot (Team size: 2) Html/Css, MySql, Php

- Developed and implemented "SoldierSlot" project to address overcrowding and conflicts in the army canteen (CSD) caused by high rush.
- Integrated a QR code authentication feature to verify the authenticity of users and prevent fraudulent activity, such as edited screenshots.
